SUMMARY

I build scalable, end-to-end full-stack applications, delivering robust backend systems and intuitive user interfaces using **Python, Django, FastAPI, Java, and modern web technologies**.

I enjoy solving real-world problems through clean architecture, maintainable code, and practical engineering solutions, with a strong focus on performance, scalability, and user experience.

EDUCATION

Master of Computer Applications (MCA),
St. Francis de Sales College Autonomous
09/2024 – 08/2026 | Bangalore

B.Sc. Computer Science & Electronics,
St. Francis de Sales College Autonomous
09/2021 – 09/2024 | Bangalore

INTERSHIPS

Asista Software Solutions Pvt Ltd, Software Developer Intern
05/2026 – Present | Bangalore

- Contributed to the development of an AI-powered Accounts Payable (AP) Automation System.
- Developed backend APIs using FastAPI and managed PostgreSQL databases with SQLAlchemy.
- Built frontend components using Next.js and TypeScript.
- Integrated AI-based invoice data extraction and used Docker for containerized development.

Dyashin Technosoft Pvt. Ltd, Java Full Stack Intern
09/2025 – 10/2025 | Bangalore

- Built and maintained full-stack applications using **Java, Spring Boot, and React**.
- Integrated front-end interfaces with back-end APIs, contributing to system architecture.
- Improved deployment, debugging, and overall code reliability.

Evobi Automation Pvt. Ltd, Robotics Production Intern
03/2024 – 04/2024 | Bangalore

- Developed and debugged robotic control code to improve automation and system stability.
- Worked with **embedded systems** and testing frameworks to optimize performance.
- Contributed to QA and process integration, reducing operational errors.

PROJECTS

Smart Grid Anomaly Detection System
03/2026 – Present

GitHub: <https://github.com/Nithin-joshua/Smart-Electricity-Grid-Anomaly-Detection-System> 

Built an IoT-based Smart Grid Anomaly Detection System that simulates 50 smart electricity meters and detects energy theft and abnormal consumption patterns in real time using an LSTM Autoencoder and TensorFlow Lite. Leveraged MQTT for data streaming, InfluxDB and Grafana for monitoring, and Docker Compose for portable deployment with sub-5-second anomaly detection.

Biometric Voice Authentication System

11/2025 - 02/2026

GitHub: <https://github.com/Nithin-joshua/Bio.VAN> 

- Built speaker recognition using **ECAPA-TDNN (SpeechBrain)**.
- Developed backend with **FastAPI + Milvus**, using **cosine similarity** and **encrypted embeddings**.
- Optimized with **lightweight preprocessing** and **modular architecture** for efficient deployment.

AI Document Intelligent Platform

06/2026 - Present

- Engineered an enterprise-grade AI document processing platform using **FastAPI, PostgreSQL, React/Next.js, Docker, and LLMs**.
- Automated OCR-based extraction, document classification, structured data generation, confidence scoring, and rule-based validation.
- Designed a modular workflow supporting document ingestion, human review, approval workflows, audit logging, and analytics dashboards.
- Built scalable REST APIs and integrated asynchronous background processing for efficient handling of high-volume document workflows.

AWARDS

UGC-NET Qualified - Computer Science & Applications (December 2025),

National Testing Agency

2025

Qualified the University Grants Commission National Eligibility Test (UGC-NET) in Computer Science & Applications with a **93.71 percentile**, demonstrating strong academic proficiency and earning eligibility for **Assistant Professor** positions and **Ph.D. admission** across recognized universities in India.

PUBLICATIONS

Large Language Processing and Comparative Analysis with Traditional Machine Learning Models

Co-Author of the research paper *Large Language Processing and Comparative Analysis with Traditional Machine Learning Models*, published in the **Role of Green Smart Technology for Sustainable Future (TGST-2026)** Conference Proceedings (ISBN: **978-93-6163-972-2**). The paper presents a comparative study of Large Language Models and traditional machine learning approaches for intelligent language processing.

CERTIFICATIONS

Python

Certificate Course on Python from IIT Bombay

C Programming

Certificate Course for C Programming from Spoken Tutorial

Python for Data Science

Certificate Course on Python for Data Science from Swayam

DSA Mastery with Java.

Certificate course on DSA from ExcelR

PHP & SQL

Certificate Course on PHP&SQL from IIT Bombay

SKILLS

Programming Languages:

Python, Java, JavaScript, C

Frontend:

HTML, CSS, React, Tailwind CSS, Next.js

Backend:

Django, Fast API

Databases:

PostgreSQL, MongoDB

DevOps:

Docker
